

### **NOTIFICATION OF UPCOMING WORK – July 25, 2019**

- Please note that the Municipality will proceed with work on Pères-Dominicains Road over the course of the next month in order to comply with the rules and regulations in force.
- As you know, during the last floods, the Municipality has had to build an embankment in order to allow residents to access their property, in accordance with the directives of the Quebec Ministry of Public Security (MSP), since this was an authorized preventive measure.
- However, during the recovery period, the Municipality has to respect the *Policy on the protection of shorelines and floodplains* which does not authorize embankments in zones of high or low current, and we will therefore soon be carrying out this work.
