

Fire Prevention is YOUR RESPONSIBILITY!

10 FIRE-PREVENTION TIPS

SMOKE DETECTORS

- Install a smoke detector on each floor, including the basement.
- Choose a photoelectric cell model, which triggers fewer unnecessary alarms.
- Change the detector according to the replacement date that the manufacturer indicates on the case.

EVACUATION PLAN IN CASE OF FIRE

- Locate two possible exits.
- Identify an assembly point located outside and inform all the occupants of the residence.
- Rehearse with all the occupants the steps to be followed during an evacuation in case of fire.

HOW TO EVACUATE YOUR RESIDENCE

- Close the doors behind you to prevent flames and smoke from spreading to other rooms or into other dwellings.
- Dial 911 once you are outside your residence.

SMOKERS' ITEMS

- Do not throw cigarette butts into flowerpots or on mulch.
- Place butts in a metal container.

SOURCES OF HEAT

- Move curtains or furniture at least 10 cm from radiators, electric baseboard heating units or any other heat source.

ELECTRICITY

- Have a master electrician carry out the electrical installation in your residence.
- Use electrical appliances approved in Canada and bearing the CSA and ULC marks.

CARBON MONOXIDE

- Install a carbon monoxide detector if your garage adjoins your residence or if you use non-electric heating or cooking units.
- Follow the manufacturer's instructions to install the carbon monoxide detector.

PREVENT COOKING FIRES

- Constantly monitor food that is cooking and use a timer.
- Never heat oil in any type of cauldron to fry foods. Use a thermostat-controlled deep fryer.

CHIMNEY SWEEPING

- Have an expert inspect and sweep your chimney once a year, before the heating season begins. The same applies to the outlet pipes of pellet fireplaces.

HOT ASHES

- Let hot ashes cool off outside in a metal container with a metal lid.
- Wait at least seven days before transferring them to a trash bin.
